INTRO

Welcome to my ^{Digital} portfolio where I
showcase my projects & interest
into tech & computing fields.

ABOUT ME

Hi there, My name is Mohamed Gadelhak.
A recent graduate of University of Southern
Queensland Majoring in Computer
Systems Engineering.

I am passionate about coding
& developing systems which
assists in solving real life problems.

As well as I do enjoy playing Badminton
going out and listening to music.

I value Creativity Innovation and Problem Solving a lot hence why I choose my major studies

Skills/Competencies

I am proficient in using:

- Jupyter Notebook for Python programming for various system Applications
- VS for C/CPP based systems as well as C++ libraries
- MPLABX for Embedded systems design
- Unity Editor for Game development in C++
- Tinkercad and Circuitlab for circuits design & Javascript programming
- ZelioSoft for ladder logic programming & control
- Weboots for Machine learning & computer vision

- Google Colab for team based projects & AI based systems

Am Also familiar with

- AI training techniques such as RAG & Finetuning
- MATLAB programming & Analysis
- Wireshark usage for Network address tracking & Analysis
- CLM Software such as Chewell & Service Now
- PIXI bots & windows error troubleshooting
